

**GokarajuRangaraju Institute of Engineering and Technology  
(Autonomous)**

**Report of the Event**

**Title of the Event: Workshop on “Data Science & Big Data Analytics” in association with ICT**

**Organized Date: 11th & 12th December 2017, Vardhaman College of Engineering, Kacharam Hyderabad**

**Faculty: Dr.Y Srilalitha ,Ms.V Shailaja and Ms.K Anusha Nagina**

**Summary:**

Big data is data sets that are so voluminous and complex that traditional data-processing application software are inadequate to deal with them. Big data challenges include capturing data, data storage, data analysis, search, sharing, transfer, visualization, querying, updating, information privacy and data source. There are a number of concepts associated with big data: originally there were 3 concepts volume, variety, velocity
